No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1992 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

CONTENTS OF VOLUME 297

Number 1, August 15, 1992

COMMUNICATION

β-Carotene and α-Tocopherol Are Synergistic Antioxidants *Paola Palozza and Norman I. Krinsky* 184

BIOLOGICAL OXIDATIONS AND P450 REACTIONS

The Effects of Catalase Gene Overexpression on Life Span and Resistance to Oxidative Stress in Transgenic *Drosophila melanogaster* *William C. Orr and Rajindar S. Sohal* 35

Baculovirus Expression and Characterization of Catalytically Active Horseradish Peroxidase *Christa Hartmann and Paul R. Ortiz de Montellano* 61

Site-Directed Mutagenesis of Glutathione *S*-Transferase YaYa: Functional Studies of Histidine, Cysteine, and Tryptophan Mutants *Regina W. Wang, Deborah J. Newton, Cecil B. Pickett, and Anthony Y. H. Lu* 86

Mitochondrial Damage and Its Role in Causing Hepatocyte Injury during Stimulation of Lipid Peroxidation by Iron Nitriloacetate *Rita Carini, Maurizio Parola, Mario U. Dianzani, and Emanuele Albano* 110

DNA–Protein Cross-Linking between Thymine and Tyrosine in Chromatin of γ-Irradiated or H_2O_2-Treated Cultured Human Cells *Ryszard Olinski, Zeena Nackerdien, and Miral Dizdaroglu* 139

Lipid Peroxidation and Its Inhibition in Low Density Lipoproteins: Quenching of *cis*-Parinaric Acid Fluorescence *João A. N. Laranjinha, Leonor M. Almeida, and Vítor M. C. Madeira* 147

ENZYME STRUCTURE AND MECHANISMS; CELLULAR REGULATION; PHOSPHORYLATION AND DEPHOSPHORYLATION

Inhibition of Glutathione Transferase π from Human Placenta by 1-Chloro-2,4-dinitrobenzene Occurs Because of Covalent Reaction with Cysteine 47 *Anna Maria Caccuri, Raffaele Petruzzelli, Francesca Polizio, Giorgio Federici, and Alessandro Desideri* 119

Enantioselective Inhibition of Human Leukocyte Elastase *William C. Groutas, Michael J. Brubaker, Radhika Venkataraman, and Michael A. Stanga* 144

GLYCOCONJUGATES AND OLIGOSACCHARIDES; PROTEOGLYCANS AND EXTRACELLULAR MATRICES

Variability in the G3 Domain Content of Bovine Aggrecan from Cartilage Extracts and Chondrocyte Cultures *Carl Flannery, Victor Stanescu, Matthias Mörgelin, Raymond Boynton, John Gordy, and John Sandy* 52

Altered Proteoglycan Synthesis via the False Acceptor Pathway Can Be Dissociated from β-D-Xyloside Inhibition of Proliferation *Susan Potter-Perigo, Kathleen R. Braun, Elke Schönherr, and Thomas N. Wight* 101

LIPIDS, LIPID MEDIATORS, AND GLYCOLIPIDS

The Influence of Endogenous Acyl-Acyl Carrier Protein Concentrations on Fatty Acid Compositions of Chloroplast Glycerolipids *Grattan Roughan and Tomoaki Matsuo* 92

MEMBRANE PROTEINS AND TRANSPORT; INTRACELLULAR SIGNALS; CYTOKINES AND RECEPTORS

Effects of Ligand Structure on the *in Vitro* Transformation of the Rat Cytosolic Aryl Hydrocarbon Receptor *M. Santostefano, J. Piskorska-Pliszczynska, V. Morrison, and S. Safe* 73

Purification and Properties of a Protamine Kinase from Bovine Kidney Microsomes *Grayson D. Amick, Shrikanth A. G. Reddy, and Zahi Damuni* 80

Identification of a 14-kDa Laminin Binding Protein (HLBP14) in Human Melanoma Cells That Is Identical to the 14-kDa Galactoside Binding Lectin *Vincent Castronovo, Frank Luyten, Frederic van den Brûle, and Mark E. Sobel* 132

The Activity of Pyruvate Carrier in a Reconstituted System: Substrate Specificity and Inhibitor Sensitivity
Katarzyna A. Nałecz, Joanna Kamińska, Maciej J. Nałecz, and Angelo Azzi 162

Extracellular Hydrolysis of Diadenosine Polyphosphates, Ap_nA, by Bovine Chromaffin Cells in Culture
F. Rodriguez-Pascual, M. Torres, P. Rotllán, and M. T. Miras-Portugal 176

PLANT BIOCHEMISTRY AND MOLECULAR BIOLOGY

The Purification and Physicochemical Characterization of Maize (*Zea mays* L.) Isocitrate Lyase
A. Salam Khan, Edilbert Van Driessche, Louis Kanarek, and Sonia Beeckmans 9

Differential Scanning Calorimetric Investigation of Pea Chloroplast Thylakoids and Thylakoid Fractions
William G. Nolan, Harry P. Hopkins, Jr., and Samir A. M. Kalini 19

Modulation of Calmodulin Levels, Calmodulin Methylation, and Calmodulin Binding Proteins during Carrot Cell Growth and Embryogenesis
Suk-Heung Oh, Henry-York Steiner, Donald K. Dougall, and Daniel M. Roberts 28

The Amino Acid Sequence of Nucleoside Diphosphate Kinase I from Spinach Leaves, as Deduced from the cDNA Sequence *Toshiko Nomura, Kimio Yatsunami, Akiko Honda, Yukihiko Sugimoto, Tetsuya Fukui, Jianing Zhang, Jun Yamamoto, and Atsushi Ichikawa* 42

Plant Sterol Biosynthesis: Novel Potent and Selective Inhibitors of Cytochrome P450-Dependent Obtusifoliol 14α-Methyl Demethylase *Florence Salmon, Maryse Taton, Pierre Benveniste, and Alain Rahier* 123

PROTEIN STRUCTURE AND FUNCTION; PROTEASES, PROTEIN TURNOVER, AND POST-TRANSLATIONAL PROCESSING

Chelatable Metal Ions Are Not Required for Aryl Hydrocarbon Receptor Transformation to a DNA Binding Form: Phenanthrolines Are Possible Competitive Antagonists of 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin
Matthew J. Mahon and Thomas A. Gasiewicz 1

Modification of Acidic Residues Normalizes Sodium Dodecyl Sulfate–Polyacrylamide Gel Electrophoresis of Caldesmon and Other Proteins That Migrate Anomalously
Philip Graceffa, Agnes Jancsó, and Katsuhide Mabuchi 46

The Heparin Binding Site of Human Extracellular-Superoxide Dismutase
Tetsuo Adachi, Tsutomu Kodera, Hideki Ohta, Kyozo Hayashi, and Kazuyuki Hirano 155

Methylations of 70,000-Da Heat Shock Proteins in 3T3 Cells: Alterations by Arsenite Treatment, by Different Stages of Growth and by Virus Transformation *Chung Wang, Jing-Meei Lin, and Elias Lazarides* 169

ERRATA

Volume 294, Number 1 (1992): William C. Groutas, Michael J. Brubaker, Radhika Venkataraman, Jeffrey B. Epp, Michael A. Stanga, and Jerald J. McClenahan, "Inhibitors of Human Neutrophil Cathepsin G: Structural and Biochemical Studies," pp. 144–146 188

Volume 294, Number 2 (1992): Albert S. Mildvan, David J. Weber, and Athan Kuliopulos, "Quantitative Interpretations of Double Mutations of Enzymes," pp. 327–340 188

Number 2, September 1992

INVITED PAPER

The Role of an Endogenous Nonheme Iron in Microsomal Redox Reactions *Giorgio Minotti* 189

COMMUNICATIONS

Novel Protein Inhibits *in Vitro* Precipitation of Calcium Carbonate
Sybil K. Burgess, Dana M. Carey, and Sharon L. Oxendine 383

Phosphatidic Acid and Lysophosphatidic Acid Stimulate Receptor-Regulated Membrane Currents in the *Xenopus laevis* Oocyte *James E. Ferguson and Michael R. Hanley* 388

BIOLOGICAL OXIDATIONS AND P450 REACTIONS

Polyvanadate-Stimulated NADH Oxidation by Plasma Membranes—The Need for a Mixture of Deca and Meta Forms of Vanadate *P. Kalyani and T. Ramasarma* 244

Fungal Quinone Pigments as Oxidizers and Inhibitors of Mitochondrial NADH: Ubiquinone Reductase *Daiva A. Bironaité, Narimantas K. Čénas, Žilvinas J. Anusevičius, Alexander G. Medentsev, Vasilyi K. Akimenko, and Sergey A. Usanov* 253

Inhibition of Lipid Peroxidation Promoted by Iron(III) and Ascorbate *Dorothy C. Beach and Eugene Giroux* 258

Effect of Hydrogen Peroxide on Calcium Homeostasis in Smooth Muscle Cells *Antonella Roveri, Mariagrazia Coassin, Matilde Maiorino, Adriana Zamburlini, Frank Th.M. van Amsterdam, Emiliangelo Ratti, and Fulvio Ursini* 265

Astaxanthin and Canthaxanthin Are Potent Antioxidants in a Membrane Model *Paola Palozza and Norman I. Krinsky* 291

Cytochrome C (Fe^{2+}) as a Competitive Inhibitor of NADPH-Dependent Reduction of Cytochrome P450 LM2: Locating Protein–Protein Interaction Sites in Microsomal Electron Carriers *D. R. Davydov, B. V. Darovsky, I. R. Dedinsky, I. P. Kanaeva, G. I. Bachmanova, V. M. Blinov, and A. I. Archakov* 304

F_1-ATPase with Cysteine Instead of Serine at Residue 373 of the α Subunit *Rita S.-F. Lee, Susan Wilke-Mounts, and Alan E. Senior* 334

Catalytic Properties of *Escherichia coli* F_1-ATPase Depleted of Endogenous Nucleotides *Alan E. Senior, Rita S. F. Lee, Marwan K. Al-Shawi, and Joachim Weber* 340

The Chelation of Nonheme Iron within Sickle Erythrocytes by the Hydroxypyridinone Chelator CP094 *Andrew Hartley and Catherine Rice-Evans* 377

ENZYME STRUCTURE AND MECHANISMS; CELLULAR REGULATION; PHOSPHORYLATION AND DEPHOSPHORYLATION

Allosteric Regulation of tPA-Mediated Plasminogen Activation by a Modifier Mechanism: Evidence for a Binding Site for Plasminogen on the tPA A-Chain *Alexander G. Geppert and Bernd R. Binder* 205

Purification and Characterization of Glucosamine-6-phosphate Deaminase from Dog Kidney Cortex *Roberto Lara-Lemus, Carlos A. Libreros-Minotta, Myriam M. Altamirano, and Mario L. Calcagno* 213

Proteolysis with Trypsin of Mammalian Tyrosinase Isoforms from B16 Mouse Melanoma *Paloma Valverde, José-Carlos García-Borrón, Francisco Solano, and José-Antonio Lozano* 221

Association of a Heat-Stable Inhibitor Protein with Cyclic-3′,5′-AMP-Dependent Protein Kinase from the Nematode *Ascaris suum:* Purification and Characterization of the Inhibitor *Ralf Hoffmann, Stephan Jung, and Hans Werner Hofer* 296

Studies on Geranylgeranyl Diphosphate Synthase from Rat Liver: Specific Inhibition by 3-Azageranylgeranyl Diphosphate *Hiroshi Sagami, Tatsumi Korenaga, Kyozo Ogura, Arthur Steiger, Hyung-Jung Pyun, and Robert M. Coates* 314

GENE EXPRESSION, TRANSCRIPTION, AND TRANSLATION

Location and Characterization of Multiple Glucocorticoid-Responsive Elements in the Rat Serine Dehydratase Gene *Yeu Su and Henry C. Pitot* 239

Estradiol Regulates Class I Alcohol Dehydrogenase Gene Expression in Renal Medulla of Male Rats by a Post-transcriptional Mechanism *Mona Qulali and David W. Crabb* 277

Two Coding Regions Closely Linked to the Rat Apolipoprotein E Gene: Nucleotide Sequences of Rat Apolipoprotein C-I and ECL cDNA *Peiyan Shen and Geoffrey J. Howlett* 345

LIPIDS, LIPID MEDIATORS, AND GLYCOLIPIDS

Primary Structure of Locust Flight Muscle Fatty Acid Binding Protein
Heather M. Price, Robert O. Ryan, and Norbert H. Haunerland 285

Regulation of Phospholipase Cδ Activity by Sphingomyelin and Sphingosine
Tadeusz Pawelczyk and John M. Lowenstein 328

Fragmentation of Dimyristoylphosphatidylcholine Vesicles by Apomyoglobin
Jong Woo Lee and Hyoungman Kim 354

Inhibition of Glucocerebrosidase and Induction of Neural Abnormality by Cyclophellitol in Mice
Sonoko Atsumi, Chisato Nosaka, Hironobu Iinuma, and Kazuo Umezawa 362

MEMBRANE PROTEINS AND TRANSPORT; INTRACELLULAR SIGNALS; CYTOKINES AND RECEPTORS

Characterization of Polyphosphoinositide-Specific Phospholipase C in Rat Parotid Gland Membranes
Yukiharu Hiramatsu, Valerie J. Horn, Bruce J. Baum, and Indu S. Ambudkar 368

PROTEIN STRUCTURE AND FUNCTION; PROTEASES, PROTEIN TURNOVER, AND POST-TRANSLATIONAL PROCESSING

Characterization and Partial Purification of an Insulinase from *Neurospora crassa*
Hemanta K. Kole, Deborah R. Smith, and John Lenard 199

Degradation of Rat Liver Cytochromes P450 3A after Their Inactivation by 3,5-Dicarbethoxy-2,6-dimethyl-4-ethyl-1,4-dihydropyridine: Characterization of the Proteolytic System
Maria Almira Correia, Suzanne H. Davoll, Steven A. Wrighton, and Paul E. Thomas 228

Localization of Two Binding Domains for Thrombospondin within Fibronectin
Rasheeda S. Zafar, Zhi Zeng, and Daniel A. Walz 271

Thyroid Peroxidase Glycosylation: The Location and Nature of the N-Linked Oligosaccharide Units in Porcine Thyroid Peroxidase
Allen B. Rawitch, Gail Pollock, Shi-Xin Yang, and Alvin Taurog 321

ERRATUM
Volume 287, Number 2 (1991): M. Sharon Stack, Celia G. Emberts, and Robert D. Gray, "Application of *N*-Carboxyalkyl Peptides to the Inhibition and Affinity Purification of the Porcine Matrix Metalloproteinases Collagenase, Gelatinase, and Stromelysin," pp. 240–249 393

AUTHOR INDEX FOR VOLUME 297 394

NOTICE

The Subject Index for Volume 297 will appear in the December 1992 issue as part of a cumulative index for the year 1992.

Archives of
Biochemistry and Biophysics

INSTRUCTIONS FOR AUTHORS[1]

Archives of Biochemistry and Biophysics is an international journal dedicated to the dissemination of fundamental knowledge in all areas of biochemistry and biophysics. **Communications** and **regular manuscripts** that contain new and significant information of general interest to workers in these fields are welcome. Sufficient detail must be included to enable others to repeat the work.

Communications offer a means of early publication of work of such importance that rapid publication is warranted. They should not exceed 15 double-spaced typed manuscript pages in length (including text, bibliography, tables, and figures). To expedite review and processing of communications, authors should send them directly to an Executive Editor most closely associated with the subject category of the communication. Communications sent to the Editorial Offices of the journal (see below) will be assigned to an Executive Editor.

Accelerated status may be given to those manuscripts that are reviewed as outstanding and that require little or no revision. At submission, authors may request accelerated publication of their manuscript. To expedite publication of such articles, authors will not receive proofs.

Manuscripts should be written in clear, concise, and grammatical English and should be submitted in quadruplicate (one original and three photocopies), including four sets of original figures or good quality glossy prints, to:

Archives of Biochemistry and Biophysics
Editorial Office, Third Floor, 1250 Sixth Avenue
San Diego, California 92101

Failure to receive the required number of copies of the manuscript may delay review. All copies of halftone artwork *must* be glossy prints or originals; photocopies of halftones do not show sufficient detail to be used for the review process. *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

For nucleotide sequence data authors are encouraged to submit original nucleotide or amino acid sequence data to a databank such as GenBank or EMBL. A footnote that includes the accession number should be included on the title page. It is preferable that the sequence data be deposited either prior to submission or by the time of acceptance of the manuscript. However, a footnote can be added at the proof stage if the material is deposited after acceptance. For further information please contact the editorial office or GenBank or EMBL directly.

Policy regarding publication of experiments on unanesthetized animals conforms with the standards for use of laboratory animals established by the Institute of Laboratory Animal Resources, U.S. National Academy of Sciences. Experiments in which curariform agents are used must be justified and details as to steps taken to reduce or avoid distress to the animal must be provided, particularly with regard to electrical stimulation.

Original papers only will be considered. ***Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out. It is the responsibility of the corresponding author to obtain the agreement of all the coauthors of the manuscript prior to its submission to the journal.*** Abstracts of oral or poster presentations are not considered to constitute previous publication. Presentation of material in preliminary communications normally will not preclude publication of a full paper in *Archives*, provided that the full paper contains additional information that justifies its publication and does not repeat the presentation of the same data that supported the preliminary communication. The manuscript should be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or under editorial consideration by another journal. Authors must verify the wording of any cited personal communication with the persons who supplied the information and obtain approval for the use of their names in connection with the quoted information or for the citation of unpublished work; written evidence of such approval should accompany the manuscript. All material published in *Archives* represents the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

Authors should suggest competent reviewers in their field and may also suggest individuals whom they wish to have excluded from the review process. The corresponding author will receive a decision letter from the Executive Editor. Revised manuscripts and correspondence concerning such manuscripts should be sent to the Executive Editor at the address indicated on the decision letter. Revised manuscripts should be accompanied by a copy of the unrevised version.

Many acceptable papers require minor revision or condensation. It is in the mutual interest of both the authors and the journal that amended manuscripts be returned promptly. A revised paper will retain its original date of receipt only if it is received by the Executive Editor within 2 months of the date of return to the author.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Form of manuscript. Manuscripts should be typewritten and double-spaced throughout on one side of 8.5 × 11-in. white

[1] An extended Instructions to Authors is published in the January issue of *Archives of Biochemistry and Biophysics*. Reprints are available from the Editorial Office upon request. Authors should consult the extended Instructions for details on nomenclature, IUPAC–IUB rules and recommendations, and accepted abbreviations.

paper, with 1-in. margins on all sides. All pages should be numbered consecutively.

Subject Areas. Authors should specify on page 1 of the manuscript the Subject Area of the article submitted:

Biological Oxidations and P450 Reactions
Glycoconjugates and Oligosaccharides; Proteoglycans and Extracellular Matrices
Lipids, Lipid Mediators, and Glycolipids
Biophysical Chemistry and X-Ray Crystallography
Membrane Proteins and Transport; Intracellular Signals; Cytokines and Receptors
Enzyme Structure and Mechanisms; Cellular Regulation; Phosphorylation and Dephosphorylation
Plant Biochemistry and Molecular Biology
Protein Structure and Function; Proteases, Protein Turnover, and Post-Translational Processing
Gene Expression, Transcription, and Translation

Page 1 should contain the article title, author(s), affiliation(s), a short running title (abbreviated form of title) of less than 65 characters including letters and spaces, the appropriate subject category for listing in the Table of Contents, suggestions for index list entries, and the name, complete mailing address, and telephone and fax numbers of the person to whom correspondence should be sent.

Page 2 should contain a short abstract of 50–250 words.

Editorial style should conform to the *Handbook for Authors* (American Chemical Society).

Footnotes to the text should be identified by superscript Arabic numerals and should be typed double-spaced on a separate sheet: footnotes to tables should be identified by superscript lowercase italic letters (^{a,b}, etc.) and placed at the bottom of the table.

Tables should be numbered with Roman numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the entries in the table.

Authors can submit complex tables and mathematical material as camera-ready copy. In this way, they are spared multiple, tedious proofreadings and the chance of error is reduced. Tables submitted as camera-ready copy should be typed single-spaced whenever possible and preferably submitted as 5 × 7-in. glossy prints.

Figures should be cited consecutively in the text by Arabic numerals. Legends should be typed double-spaced on a separate sheet. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. They should be planned to fit the proportion of the printed page ($7\frac{1}{8}$ × 9 in.; column width, 3.5 in.) and submitted no larger than 8.5 × 11 in. Lettering on drawings should be of professional quality or generated by *high-resolution* computer graphics and should be large enough (10–12 points) to take a reduction of 50–60%. Drawings should be made with black India ink on tracing linen, smooth-surface white paper, or Bristol board. Alternatively, *high-quality* computer graphics may be acceptable. Graph paper, if used, should be ruled in blue. Glossy prints of figures properly prepared are acceptable. Illustrations in color can be accepted only if the authors defray the cost.

Cover photographs. Suggestions for *cover photographs* are welcome. Submit them as slides with $8\frac{1}{2}$ × 11-inch color or black-and-white prints to accompany specific articles. A short (one-line) legend should accompany each photograph.

References should be cited in the text by an Arabic numeral in parentheses and listed at the end of the paper in numerical order typed double-spaced on a separate sheet. Abbreviations of journal titles should conform to those of *Chemical Abstracts Service Source Index*, 1985. Please note the following examples.

1. Mottley, C., Robinson, R. E., and Mason, R. P. (1991) *Arch. Biochem. Biophys.* **289,** 153–160.
2. Stein, W. D. (1986) Transport and Diffusion across Cell Membranes, Academic Press, San Diego.
3. Magnani, J. L., Spitalnik, S. L., and Ginsburg, V. (1987) *in* Methods in Enzymology (Ginsburg, V., Ed.), Vol. 138, pp. 195–207, Academic Press, San Diego.

Miniprint supplements are an effective way of presenting supportive data. They are printed from plates made by photographic reduction from typed pages provided by the author. Types of data that have been published as miniprint supplements include analyses relevant to studies of amino acid or polynucleotide sequences, details of chemical syntheses, preparation of enzymes, extended statistical or mathematical discussions, and X-ray diffraction data. The miniprint supplement is published in the journal, immediately following the parent paper, and is included in the reprints. Since the miniprint supplement is produced from camera-ready copy supplied by the authors with no redaction or editorial changes it is important that the copy be letter perfect and conform to the style of the journal. *Authors will not be permitted to make changes to the miniprint supplement at the proof stage. Any changes necessary in the proof must be made as a typeset "Note added in proof."*

Proofs will be sent to the author, with a reprint order form. Authors will be charged for extensive alterations.

Reprints. Fifty reprints of each article will be provided free of charge. Additional reprints may be purchased.

Personal computer disks. Manuscripts may be submitted to *Archives of Biochemistry and Biophysics* on personal computer disks after the manuscript has been accepted and after all revisions have been incorporated onto the disk. Please supply the file as a straight ASCII file with generic codes specified by the publisher. Label the disk with the type of computer used, the type of software and the version number, and the disk format. All tabular and mathematical material will be typeset conventionally. Art must be prepared as camera-ready copy; see the section on Figures earlier in these Instructions for Authors.

A hard copy printout of the manuscript that exactly matches the disk file must be supplied. Academic Press will not accept disks without accompanying printouts of all files on the disk. File names must clearly indicate the content of each file. The manuscript will be edited according to the style of the journal, and the proofs must be read carefully by the author. Disks that are not translatable or economical to process will not be used. The publisher reserves the right not to use the disk.

For further information on preparing the disk for typesetting conversion and a list of generic codes, please contact the publisher (Editorial Supervisor, Journal Division, Academic Press, 1250 Sixth Avenue, San Diego, California 92101; telephone: 619 699-6415; fax: 619 699-6800).
